FRONTIERS IN MODELING AND CONTROL OF BREATHING

Book Condition: New. Publisher/Verlag: Springer, Berlin | Integration at Molecular, Cellular, and Systems Levels | The field of neural control of breathing has advanced rapidly in the past two decades, with the emergence of many new and promising research directions of increasing sophistication. The complexity and diversity of the current methodologies signify its remarkable vivacity, albeit at the price of much confusion. Captured in this book are the broad and intricate nature of the field and its multifaceted frontiers, including...
