American Psychiatric Publishing. Hardback. Book Condition: new. BRAND NEW, The Difficult-to-Treat Psychiatric Patient, Mantosh J. Dewan, Ronald W. Pies, Why do some psychiatric patients fail to get better, even when in the care of competent clinicians? Treatment-refractory conditions are all too common in everyday clinical practice. Treatment resistance occurs across the full spectrum of psychiatric disorders, incurring enormous emotional, economic, and social costs. In the United States, treatment of depression alone costs more than \$40 billion annually, and as many as 40% of patients with depression have a treatment-refractory form of the illness. This groundbreaking clinical guide starts where standard textbooks end, focusing on clinical strategies to be used after all basic treatment options, such as medication and psychotherapy, have failed. In this book expert contributors address the sequential clinical steps in treating difficult-to-treat psychiatric patients by offering a blend of evidence-based clinical recommendations, detailed case vignettes, treatment algorithms, and -- when necessary to go beyond the reach of evidence -- the clinical wisdom of leaders in the field. The chapters in this user-friendly, practical guide are organized by major disorder. Each chapter offers concrete recommendations on what to do when the usual first steps in therapy are ineffective, including evidence for biopsychosocial treatments alone versus in combination, generic versus specific therapies, and literature reviews and the latest expert wisdom. A sampling includes * The management of the complex and often refractory bipolar disorder, which involves replacing or combining lithium treatment with anticonvulsants or atypical antipsychotic agents with adjuncts such as benzodiazepines, thyroid hormone, and electroconvulsive therapy, but also -- above all -- with careful attention to the therapeutic alliance.* The importance of combined therapeutic modalities for patients with schizophrenia -- especially given managed care's cost-cutting strategies, which deprive many schizophrenic patients of effective treatment modalities such as family therapy...
