The topics discussed are the age, conjugal condition, days lost on account of sickness, daily wages, and occupations of the workers. According to data published in the annual mineral statistics for 1905, the total number of persons in the Kingdom in 1905 employed in mining was 63,996 and in quarrying 59,342. The age grouping of employees in mines and quarries is shown in the table following. PER CENT OF EMPLOYEES IN MINES AND IN QUARRIES, IN EACH AGE GROUP, AT THE BEGINNING OF 1906. The largest percentage of workers in mining is shown to be between the ages of 22 and 30, with a rapid decrease in the number of workers in the higher ages. In quarrying the distribution, among the groups, is more uniform, but also shows the same general features. The following table shows the...
